HERITAGE

More than 70 years in the worldwide market!

Enta has a very long and famous background in prosthetic teeth made out of porcelain.

In 1947, Enta was founded in Holland and began successful producing of ceramic denture teeth.

In 2004 Enta's facilities have been relocated in Izmir by establishing a manufacturing joint-venture, Atlas-Enta.

Enta-Ceram teeth are commercialised in the markets with highest standards such as West & North-Europe, United States and Canada.

Enta-Ceram looks forward to continuing the unique handmade art of the porcelain teeth!

2004

Doing something unique, because only few people in the world can do this work
